Re: Deactivation as a Public Water System
PWS ID# WY5680118NC
Date Deactivated: 07/28/2003

Dear Mr. Yasuda::

Based on our phone conversation on July 28, 2003, we are deactivating Targhee NF - Alpine Campground as a public water system (PWS) and, therefore, you are no longer required to comply with Federal drinking water regulations. Since the campground and the 4-H camp are one and the same, it is only necessary to keep one system active. According to our conversation, along with Mr. Mike Sposit's input, the operator at the Alpine 4-H Camp will take two coliform samples each quarter during the open season - one at the 4-H Camp and one at the Alpine Campground. The 4-H Camp will also be responsible for one nitrate test each year.

Deactivation as a Federal public water system does not negate state regulations for construction permits or operator certification. Contact the Wyoming Department of Environmental Quality if you have questions pertaining to these requirements.

If you have any questions, please call me at 1-800-227-8917, Extension 6280.

Sincerely,

SIGNED

Charla Colson
Environmental Protection Specialist
Public Water System Program

cc: Joe Wetzel (Alpine 4-H Camp)
